

WHAT IS CLAIMED IS:

1. A holder for multiple items comprising:
a first elongated strap with two ends and including a first attachment mechanism at one end,
a connector attached to the other end of said first elongated strap,
a plurality of secondary elongated straps, each for removably holding an independent item, each of said secondary straps having two ends one of which is secured to said connector with the other end being connected to a separate holder.
2. The holder as in claim 1, wherein each of said separate holders are identical.
3. The holder as in claim 1, wherein each of said separate holders are each different from one another.
4. The holder as in claim 1, wherein each of said secondary straps is elastic.
5. The holder as in claim 1, wherein each of said separate straps is formed from a stiff material.
6. The holder as in claim 5, wherein the stiff material has some degree of flexibility.
7. The holder as in claim 1 further including a second attachment member at the other end of said first elongated strap.
8. The holder as in claim 1, wherein said separate holders comprise rings.
9. The holder as in claim 1 wherein said separate holders comprise spring closed clamps.
10. The holder as in claim 1 wherein said separate holders comprise snap clips.

11. The holder as in claim 1 further including a second strap and a releasable closure connected there between.
12. The holder as in claim 1 wherein said first elongated strap is a molded, one-piece structure.
13. The holder as in claim 11 wherein said second strap includes a second attachment member spaced from said releasable closure.
14. The holder as in claim 13 wherein said second strap is comprised of a molded material.
